

CHAPTER V

CONCLUSION AND SUGGESTION

Chapter V of this study presents the following sub-topics: (1) conclusion and (2) suggestion of the study.

5.1. Conclusion

In accordance with the results, I can conclude that as *Muhadhoroh* program was a weekly conducted, beneficial and compulsory program for all the students at SMP IT Raudhatul Ulum, however many challenges were found here. The students as well as instructors indeed faced challenges in *Muhadhoroh* program. There were five challenges faced by the students. The very first challenge was mother-tongue use. The students were unable to use and deliver the speech in fully English. They used their mother tongue instead of English. The next challenge was low or uneven participation. They could not perform and deliver the speech equally, lazy, not interested and their participations were low. Inhibition was the third challenge found. The students were afraid of making mistakes and afraid of being criticized by others in delivering the speech as they became nervous when witnessed by many people. Then, lack of motivation was the next challenge. The students did not want to say anything and had no motives to express themselves. The last was uninteresting topics. The topics of speaking materials of the speech were boring.

Meanwhile, there were two challenges faced by the instructors found. The first challenge was lack of teaching materials. Although the books were already provided, there were still needed more materials. The instructors and school must

put attention to the teaching materials and should not be lacking. The second challenge was lack of students' confidence in *Muhadhoroh* program. The students were not confident to deliver the speech and hence made the instructors difficult to see the students' interests in *Muhadhoroh* program.

5.2. Suggestions

Based on the conclusions elaborated above, I would like to suggest some suggestions related to *Muhadhoroh* program at SMP IT Raudhatul Ulum. Here, I would like to offer suggestions for the students, the instructors in *Muhadhoroh* program at SMP Raudhatul Ulum and future studies.

Firstly, the students at SMP IT Raudhatul Ulum are expected to participate passionately and intentionally in *Muhadhoroh* program. *Muhadhoroh* program is designed to all the students to be excellent public speakers, so they should practice more and participate. Thus, the students in *Muhadhoroh* program at SMP IT Raudhatul Ulum should not be afraid of the challenges that they may face, instead keep practicing and participating.

Secondly, the suggestion I would offer is for the instructors in *Muhadhoroh* program at SMP IT Raudhatul Ulum. The instructors are hoped to facilitate the students in *Muhadhoroh* program. In other words, though various challenges emerged here and are faced by the instructors, they are still required to guide the students and have essential roles for the succession of *Muhadhoroh* program.

Lastly, the suggestion for the future studies. The future studies should invest and explore deeply regarding the *Muhadhoroh* program especially the challenges.

This research only elaborated the challenges faced by the students and the instructors. Thus, the future studies are expected and required to explore the challenges deeply and find out the possible solutions to reduce the challenges in *Muhadhoroh* program.
