CHAPTER V

CONCLUSION AND SUGGESTION

In this part, it presents: (1) conclusion and (2) suggestion.

5.1   Conclusion

Based on the result of the study, it can be concluded that teacher at SMK Negeri 5 Palembang used some strategies in teaching speaking . The researcher found several strategies used by the teacher in teaching speaking. Those strategies are : discussion, role play, and drilling.

First, the discussion is strategy that teachers use to teach English to student, of grouping strategies, discussion may be the most flexible and powerful teaches can use cooperative activities in variety of ways in many different situations. Second strategy is role play, role play is really worthwhile learning experience for both students and the teacher not only can students have more oppurtunities to "act" and "interact" and the their speaking will improve. Third strategy is creative tasks to be make their learning will easy and simple and the student the enjoyed with the material especially in teaching speaking. And the last strategy is drilling to make the learner understand the second language by memorizing and practice speaking with drilling from communication. This strategy was used to teach speaking to students at SMK Negeri 5 Palembang.

5.2   Suggestions

From the conclusion stated above, I would like to give some suggestions for the teachers, students, and other researchers.

Firstly, for the teachers, as teaching speaking was not easy, teachers was face many obstacle during teaching learning process. Furthermore, teachers' should be careful while choosing appropriate teaching strategies. The teacher should order students to have more practice and drilling of vocabulary, grammar, and also pronunciation. Secondly, for

the students should be more active using English than Indonesian language. The students expected to be more active to take a part in the process of teaching and learning speaking. The students should learn about grammar and memorize the vocabulary by themselves. Thirdly, For the other researcher are expected to use the finding of the research as the reference to conduct another research with the similar problem. The result of the research was expected to be able to used as encouragement for the next researcher.
