

Message Optimization Of Hadith
In the face of the disaster in various places and Times
By. Uswatun Hasanah

Already a sunnatullah that in human life always be in trouble. Not only the difficulties in dealing with the disaster but also the difficulty in the face of good luck. Not only on the problems of the world but also has to do with the life hereafter. Limitations of space life world and the burden of responsibility in the hereafter make man always living in trouble.

Although God has mentakdirkan difficulties in human life, but the fact of life of all beings who created God is felt happiness. A Jew or Christians even choose his religion because they think there's a hint of God Almighty. Hence unworthy of human care so as to remain safe in undergoing life full of trouble to get secure reach happiness remain timeless, God has sent a Messenger help humans acknowledge of happiness.

The death of the Prophet Muhammad have not produced any more impact on Hadith. But according his message that the two methodologies of life i.e. the Qur'an and Sunnah have it inherit. A hold of life that forever will remain valid without limits of time, space and also a place. Would never have though, let alone the Quran Hadith brings men to slump, underdevelopment and error as long as he'd like to cling to both.

Given the current state of my beloved Indonesia in particular experienced a considerable amount of natural disasters, then this article will discuss in particular how to optimize message Hadith the Prophet especially when facing natural disasters. The methodology is delivered through the teachings of the Prophet's Hadith is extremely important to review because it is a method that will never have the expiration period either caused by the passage of time and also the difference of the place.
