Title

:

Overall, this article can be accepted as a writing in Samarah however, it

needs to be revisited related to the scope that is related to family law and Islamic law which is reinforced because this writing only shows the practice of dowry for man as a tradition that is not much connected with family law or Islamic law

## Abstract

Abstract contains problem of research, method, and result

:

The research problem in the beginning of the paragraph has been written, but it does not clearly show the form of religious endorsement and manipulation that occurs. It will be better if an explanation is added regarding the occurrence of religious endorsement and manipulation of underage marriage. Furthermore, there is no explanation yet on how the analysis is done.

## Originality

The originality of the subject matter, and the manuscript would be of interest to the the scholar of Islamic countries in general and specifically in Indonesia

:

This article has novelty in showing how religious faith can sustain underage marriage which is known to have negative impacts on women, religious life and social life

## The Depth of Literature

Whether the article draws on an appropriate range and depth of literature (if not please indicate which sources of literature should be included by the author in future)

:

In the introduction section, the author has written two study trends with one quote each. It would be nice to add one more study trend and also add quotes to each trend to show the research gap. Similarly, in the discussion and analysis section, the need to add conceptual or theoretical references to sharpen the discussion

## Finding Presentation

Whether the findings presented are subjected to suitable analysis and sound conclusions drawn

:

This article has presented the findings clearly, although briefly. Data

that have not been analyzed carefully are still found. Therefore, further discussion and analysis on each sub-theme is needed according to the theory used

Implications for understanding the study of Islamic family law and Islamic law in Islamic in Islamic countries in general and specifically in Indonesia

:

This article has shown implications on understanding religious norms that can be used to manipulate beliefs and religious practices. Textual-partial understanding of the Qur'an and Hadith also becomes an important point that affects religious life experience

Technical writing

Articles must be in accordance with the surrounding style and journal template

This article has been in accordance with the journal template, but grammatical errors need to be taken into consideration
