ABSTRACT

This research was conducted in order to empirically prove the Village Owned Enterprise Development Strategy run by Bumdesa Semambu Makmur Semambu Island, Indralaya District, Ogan Ilir Regency in an Islamic Economic Perspective. The research uses qualitative research methods with an analytical descriptive approach. Bumdesa Semambu Makmur was established based on Village Regulation Number 07 of 2011 concerning the Establishment of a Village-Owned Enterprise, as well as the ratification of the legal entity on April 14, 2022 with number AHU-03340.AH.01.33.TAHUN 2022 by the Ministry of Law and Human Rights of the Republic of Indonesia. The main businesses being run are Home Industry which produces a variety of dry food, plastic waste processing which produces chopped plastic, and PAM Desa which provides clean water services for the residents of Pulau Semambu Village. The processing of plastic waste plays a role in maintaining cleanliness and environmental preservation, and the provision of clean water by the Village PAM is the fulfillment of the basic needs of villagers. The development of the Semambu Makmur Bumdesa relies on making various strategic decisions through village meetings, capital support from the village government, and selecting businesses according to the needs and problems of the villagers.
