

Abstrak

Kedisiplinan sangat umum di kalangan santri di pondok pesantren dalam berbagai program terjadwal yaitu, ibadah berjamaah, mengaji, melaksanakan sholat sunnah seperti dhuha dan tahajud, membersihkan kamar, dan lain sebagainya. Salah satu tanda ketaqwaan dan kecintaan seorang hamba kepada Allah SWT adalah sholat tahajud. Selain itu, kebiasaan seorang hamba melaksanakan sholat tahajud merupakan bukti cintanya kepada penciptanya. Penelitian ini bertujuan untuk mengetahui bagaimana pengaruh pembiasaan shalat tahajud terhadap karakter disiplin santri di Pondok Pesantren Daarul Hikmah Desa Sungai Rengit Murni Banyuasin.

Penelitian ini menerapkan penelitian kuantitatif dengan jenis penelitian korelasi. Data primer dan sekunder menjadi sumber data pada penelitian ini, dan dalam menghimpun data yang diperlukan peneliti menggunakan teknik pengumpulan data berupa observasi, kuesioner/angket dan dokumentasi. Teknik analisis data pada penelitian ini menggunakan *Korelasi product moment (person)*.

Berdasarkan hasil penelitian, diperoleh Sig. Senilai 0,000, dan *Pearson Corelation* 0,660. Jika Nilai Sig < 0,05 yaitu 0,000 < 0,05, maka H_a diterima dan H_o ditolak yang artinya terdapat pengaruh pembiasaan sholat tahajud terhadap karakter disiplin santri. Jika nilai *Pearson Corelation* dikonsultasikan dengan kriteria korelasi maka bisa dipahami bahwa terdapat pengaruh yang kuat dari pembiasaan sholat tahajud terhadap karakter disiplin santri di Pondok Pesantren Daarul Hikmah Desa Sungai Rengit Murni Banyuasin.

Kata kunci: Pembiasaan, Sholat Tahajud, Karakter Disiplin.

Abstract

Discipline is very common among students at Islamic boarding schools in various scheduled programs, namely congregational worship, reciting the Koran, performing sunnah prayers such as Duha and Tahajud, cleaning rooms, and so on. One sign of the devotion and love of a servant to Allah SWT is the midnight prayer. In addition, the habit of a servant performing the midnight prayer is proof of his love for his creator. This study aims to find out how the habituation of the midnight prayer affects the disciplined character of students at Daarul Hikmah Islamic Boarding School.

This study applies quantitative research with a correlation research type. Primary and secondary data became the source of data in this study, and in collecting the required data the researcher used data collection techniques in the form of observation, questionnaires/questions and documentation. The data analysis technique in this study uses product moment (person) correlation.

Based on the research results, Sig. Worth 0.000, and Pearson Correlation 0.660. If the Sig value < 0.05 , namely $0.000 < 0.05$, then H_a is accepted and H_o is rejected, which means that there is an influence of the habituation of the midnight prayer on the disciplinary character of the students. If the Pearson Correlation value is consulted with the correlation criteria, it can be understood that there is a strong influence from the habituation of the midnight prayer on the disciplinary character of the students at Daarul Hikmah Islamic Boarding School.

Keywords: *Habituation, Midnight Prayer, Discipline Character.*
