ABSTRACT

The competition in the beauty world business is getting tighter. This is accompanied by more and more skincare brands from within and outside the country. Consumer purchasing decisions are an important factor in a business, which of course in making a consumer's purchase decision considers several things such as the halalness of a product, price and quality. This study aims to determine the effect of halal labeling, price and product quality on the purchase decision of Skintific skincare products in the Review District of Ogan Komering Ulu Regency.

The research method used in this research is a quantitative method with conclusions drawn by statistical analysis using the help of IBM SPSS 25.0 applications. The population in this study is people in Peninajauan District, Ogan Komeirng Ulu Regency who have bought Skintific skincare, with the insedental sampling method, which is as many as 90 respondents. Data analysis techniques in this study are classical assumption test, pitched linear regression and hypothesis test.

The results of this study showed that the halal labeling variable partially had a positive and significant effect on the purchase decision of Skintific skincare with a calculated t value of $4.332 > t_{table} 1.662$ and a significance value $0.000 < 0.05$. The price variable partially has a positive and significant effect on the purchase decision of Skintific skincare with t value $2.557 > t_{table} 1.662$ and significance value $0.012 < 0.05$. The variable of product quality partially has a positive and significant effect on the purchase decision of Skintific skincare products with t value $2.799 > t_{table} 1.662$ and significance value $0.006 < 0.05$. The variables of halal labeling, price and product quality simultaneously have a positive and significant effect on the purchase decision of Skintific skincare products with a calculated f value $42.543 > f_{table} 2.71$ with a significant value of $0.000 < 0.05$.
