

CHAPTER V

CONCLUSIONS AND RECOMMENDATIONS

After conducting the study and knowing overall data, the researcher could make some conclusion and recommendations

5.1 Conclusions

The researcher drew some concluding remarks based on the statements of the problem of this research. They are:

1. The researcher found that in “English on sky VIII” textbook contained different percentages lexical density in each reading text , then there are nine (9) reading texts is quite category, three (3) reading texts under low category , and two (2) reading texts have high lexical density category.
2. In addition, after analyzing all the text, it is found that two reading texts have high lexical density category, there are Camping text with 60,50% and Thomas Alva Edison text with 67,68%.

5.2 Recommendations

After drawing conclusion the researcher presents some recommendations as follows :

1. Since the writer just analyzed the lexical density in reading text, it gave little explanation about lexical density. So, this study can be used as comparison for another study which is related to the lexical density.
2. The researcher recomended the teacher of English who teach to used that book as their teaching material because the book is appropriate in term of

3. lexical density. And then for the authors, they can use this study to present the textbook with balance composition between content words and grammatical function words of lexical density in order to make the students understand about the reading text.
